preparation

Place an Ink supply bottle to the back of the machine and insert the ink supply tube into the bottle.

Plug in the plug and the machine will be ready to start filling .

Now, The machine is ready to fill the cartridges. Before filling the cartridges, be sure that they are empty. If not, evacuate the remaining ink from cartridge.

This machine is designed to only fill FRESH CARTRIDGES (you can also fill non-fresh cartridges using a steam generator before filling)

Strictly recommended : Before filling the cartridges we recommend you to clean the printheads of the cartridges by a steam generator. It will help you to fill the cartridges easily and will open the all clogged or dried printheads, So, your success rate will increase

To Order Call: [+90 312 417 72 75](tel:+903124177275)

Place the cartridge in to the evacuation station if necessary

Before filling take note that the cartridge is not full or faulty . If the cartridge is not empty place it in the evacuation station and switch on the Evacuation switch to start Evacuation

Then remove the cartridge.

Place the cartridge in to the filling station.

To Order Call: [+90 312 417 72 75](tel:+903124177275)

Secure the cartridge by pushing the handle up.

Push the Start / Stop Button to start the filling operation
The cartridge will be filled in 2,5 minutes and pressurizing will also be done. If there is a problem while filling simply push the start /stop button and the operation will automatically stop.

Then remove the cartridge using the handle

For start up the cartridge, replace the cartridge into evacuation station and do evacuation 3-4 seconds, then remove cartridge and test it.
